Subject: Microsoft Settlement

Microsoft is forcing users to use their second rate products. They are forcing open source programs and applications out of the way, by making sure they do not run on windows. Microsoft inserts code into their applications for the sole reason of stopping it from running on other Operating systems.

I am not going to bother with the technical and legal mumbo jumbo which I am sure that many other people have both complained about before, and I am sure that the lawyers have brought to your attention, that is of the unfairness of the Final Judgment in United States v. Microsoft. Microsoft is forcing the computer hardware industry into a wall. It is impossible to buy a personal computer, either from Gateway, Dell, Compact, or Hewllet Packard, that does not contain Microsofts XP. Microsoft XP is a horrible product. You are punished if you dont use it, because of lack of newer software on the other operating systems. They release products before they are ready, and then 2 years later release another one that fixes half of the problems.

More should be done to stop this company. They are downright EVIL and that is an understatement. They dont care about their consumer base, just about getting their money.

Please help the american people, by making their lives a little bit less hassled by eliminating their computer woes by taking this company and forcing them to actually ACT upon their mistakes to fix these problems in America's Time of Need.

Anyone that doesn't see how the Microsoft Trail makes a big impact on people's lives (and more so in the future when more products and PCs are a bigger part of our lives), doesn't really deserve to be called an American unless they are CONCERNED about how this hurts the American people, and they feel their pain but dont act upon it.

Thank you,

God Bless the US

The Keating Family
